HISTORY

THE BEGINNING OF A TRADITION – FROM CRAFT TO ART

In 1923, in the heart of the Podkarpacie region, the KROSNO glassworks was born – a symbol of Polish artistry and precision. From a small workshop where master glassmakers created their first unique vessels, KROSNO quickly became an icon of quality and elegance. Over the years, Krosno glass earned recognition not only in Poland but all over the world. Every product combined the traditional technique of hand-blown glass with modern design, making the brand synonymous with timeless beauty.

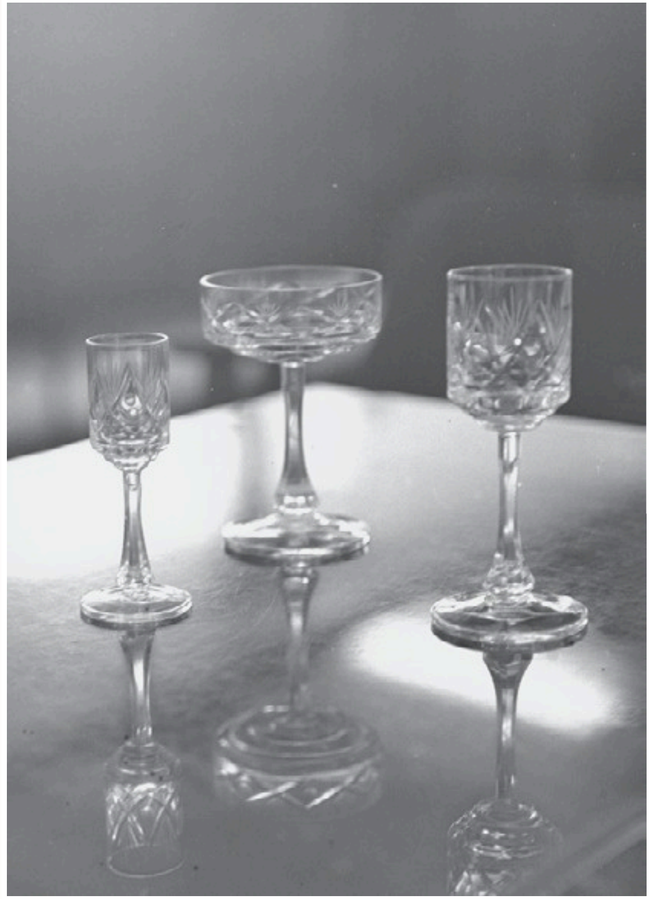

HISTORY

A HERITAGE THAT KEEPS EVOLVING

KROSNO has survived wars, changing generations and market revolutions without losing its character. Today it is a modern premium brand, combining a long-standing heritage with innovative design and technology. Every wine glass, decanter and tumbler is a tribute to the craftsmanship and passion that have shaped the brand's identity for a century. KROSNO is no longer just glass – it is a story of passion, form and emotion captured in transparent perfection.

ANNA GRABOWSKA SZCZUR

associated with the Krosno glassworks for over 30 years, she creates collections that combine functionality with exceptional artistic value. Her work has been shown at numerous exhibitions in Poland and abroad, published in the international press and honoured with prestigious awards, including the "Dobry Wzór" (Good Design) title.

MICHAŁ MISIURA

specialises in designing functional forms, drawing inspiration from the contrasts of everyday surroundings and nature. At Krosno Glass he creates fresh, bold designs that combine aesthetics with functionality. He is fascinated by the glassmaking process – the collaboration between designer and glassmaker that gives rise to unique products appreciated all over the world.

SŁAWOMIR URBANEK

with Krosno Glass since 1989, he specialises in the design of machine-formed glass and its decoration. For years his work has been highly regarded both in foreign markets and in Poland, where it is especially valued in the HORECA sector.

BEATA SZAJNA

has been creating designs at the Krosno glassworks for 20 years, combining extensive experience with a passion for painting and drawing. Her signature collections have been exhibited in Poland and internationally, including in Frankfurt, Vienna and Milan. She has won numerous awards, such as Laur Konsumenta, Złote Ville and Dobry Design. Her design – the SAMARA vase – has become an icon of the brand and one of the Krosno glassworks' most recognisable products worldwide.

DAWID PODKUL

has for years been creating designs for Krosno Glass that are valued both in Poland and in foreign markets, including the UK and Scandinavia. His work is distinguished by a deep understanding of glass – a demanding material that teaches humility but also inspires the discovery of new artistic possibilities.

JOANNA LORENS

has worked with Krosno Glass for 15 years, creating designs inspired by nature and the elements. Her glass stands out for its original design, which fits perfectly into a wide range of interior styles. Her work has been presented at, among others, the Frankfurt Messe trade fair and at ART GALLERY in the USA. She also co-created a wine glass collection with Robert Maklowicz, combining a passion for art with modern design.

DESIGNERS

KROSNO IS MADE BY PEOPLE!

Behind the unique character of our products lie the passion, talent and experience of designers who give glass its soul. Their individual style, feel for form and a perspective gained all over the world mean that the objects we create combine the tradition of craftsmanship with modernity. Every new design has its own story, built on many years of experience and a fresh outlook, creating an effect that delights with both beauty and functionality.

DECORATIONS

Glass decoration is an art with a long and rich tradition. For centuries, artists have given vessels a unique character, combining the precision of craftsmanship with artistic sensitivity. Hand painting, delicate engraving, intricately cut patterns or masterful applications – each of these techniques demanded not only skill but also patience, an aesthetic sense and a perfect feel for the material. Thanks to them, glass became more than an everyday object – it gained soul, brilliance and individual expression. These are the works we admire today in museums, galleries and private collections – symbols of artistry, tradition and beauty preserved in a transparent material.

HERITAGE COLLECTION

The HERITAGE collection is a tribute to craftsmanship, history and timeless aesthetics. Products in this line are coloured throughout the glass mass, which gives them exceptional depth and lasting colour. This is glass that tells a story dating back to 1923, which is why it bears the unique “KROSNO HANDMADE HERITAGE 1923” branding.

HERITAGE COLLECTION

RUBY
INTENSE RED

An intense red that catches the eye and energises every form. It is a colour full of emotion – deep, noble, with a hint of drama that perfectly accentuates the character of the product. Ruby glass does more than decorate – it creates atmosphere, ideal for interiors that want to express boldness, passion and style.

KROSNO 1923 HANDMADE HERITAGE

HERITAGE COLLECTION

AMBER
PURITY AND SUBTLETY

It radiates natural warmth and subtle elegance. Its golden hue evokes the setting sun, autumn light and a precious stone that has symbolised the beauty of nature for centuries. Combined with a minimalist glass form, amber brings cosiness and class to interiors, enriching the space rather than dominating it.

KROSNO 1923 HANDMADE HERITAGE

HERITAGE COLLECTION

EMERALD
DEEP GREEN

A deep green that evokes the calm and nobility of nature. Its intensity does not overpower the form but accentuates it – adding elegance, refinement and a touch of mystery. It pairs perfectly with both classic and modern settings, bringing harmony and a luxurious accent to the interior.

KROSNO 1923 HANDMADE HERITAGE

HERITAGE COLLECTION

CRYSTAL
PURITY AND SUBTLETY

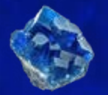

The essence of purity and subtlety – transparent, almost invisible, yet striking in its perfection. Its neutrality lets the form speak for itself, highlighting every detail and every refraction of light. It is a colour that does not compete with its surroundings but harmonises with them.

KROSNO 1923 HANDMADE HERITAGE

HERITAGE COLLECTION

COBALT
NOBLE BLUE

An intense, noble shade of blue that brings depth, cool elegance and a strong character to the form. Its saturation catches the eye while retaining class and harmony – ideal for interiors that want to emphasise modernity, style and a touch of artistic refinement.

GEMSTONE COLLECTION

The GEMSTONE PREMIUM collection combines contemporary design, subtle colour details and functionality. Products in this line feature a delicate tint that adds character without overpowering the form.

GEMSTONE COLLECTION

AMBER

Subtle amber is a warm accent that adds elegance and a natural glow.

GEMSTONE COLLECTION

AQUAMARINE

A delicate shade of blue that evokes the calm of water and adds freshness to interiors without excess.

GEMSTONE COLLECTION

EMERALD

A delicate green that exudes calm and luxury, evoking nature.

GEMSTONE COLLECTION

SMOKY QUARTZ

An elegant haze of colour – a muted, noble shade that adds depth and refinement.

GEMSTONE COLLECTION

ROSE QUARTZ

A muted, noble shade that adds depth and refinement to any form without weighing down its lightness.

GEMSTONE COLLECTION

BRONZITE

A warm, earthy tone with a metallic sheen – elegant and refined, adding depth.

GEMSTONE COLLECTION

CRYSTAL

Beauty in its purest form – transparent, timeless and versatile, highlighting the perfection of the form.

GEMSTONE COLLECTION

GIFT RANGE

DECANTER AND TUMBLERS

Our decanters and tumblers form a unique set, distinguished by a cohesive form and a distinctive colour palette. The Marszałkowska decanter, designed in 1948, has captivated for decades with its noble colour, handcrafted execution and exceptional form.

It is the details that make them a cohesive, refined whole that you can freely mix and match.

COLLABORATION

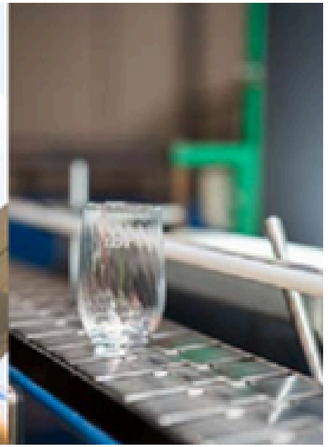

100 YEARS OF TRADITION, THOUSANDS OF JOURNEYS – KROSNO GLASSWORKS ON BOARD LOT.

In 2023, to mark its 100th anniversary, the KROSNO GLASSWORKS began a unique collaboration with LOT Polish Airlines. The result of this partnership is an exclusive glass collection that accompanies LOT passengers on their journeys, providing elegance and comfort in the air. On board an aircraft that proudly promotes the Polish brand on international routes, passengers can enjoy handmade KROSNO tumblers – a symbol of Polish design and artisanal craftsmanship. The collaboration continues to offer passengers a luxurious travel experience with KROSNO and LOT, and is a reminder that the Polish glassmaking tradition goes hand in hand with modernity and global prestige.

CRYSTAL

CRYSTALLINE PERFECTION

Purity, clarity, brilliance. KROSNO crystal is the quintessence of luxury – made from the finest lead-free glass, it captivates with its noble lustre and perfect harmony of form. Every detail has been refined with the precision of master craftsmen to bring out the most precious qualities of the material – light, delicacy and timeless beauty. It is not just glass. It is an experience of elegance that lasts.

DECORATIONS

HAND MATTE CUTTING

Hand matte cutting is an art that requires not only talent but also exceptional precision, patience and experience. The matte effect gives the surface a unique depth – the vessels take on the look of a delicate smokiness or a light frost, as if they had captured the breath of a winter morning. It is a detail that charms with its elegance and draws the eye with soft, diffused light. Hand matte cutting is more than a decorating technique – it is a master's gesture that leaves a trace of their skill and sensitivity in every glass.

APPLIED GLASS DECORATION

Applied decoration on glass is a broad term that can mean, among other things, unique colouring, original ornamentation or a variety of raised elements. Each of these applications requires outstanding precision, experience and glassmaking skill. To create an application, the glassmaker attaches a suitable portion of glass mass – pre-shaped to achieve the desired visual effect – onto a previously prepared piece. All the more remarkable is the fact that Krosno products made with this method do not differ from one another in even the smallest detail.

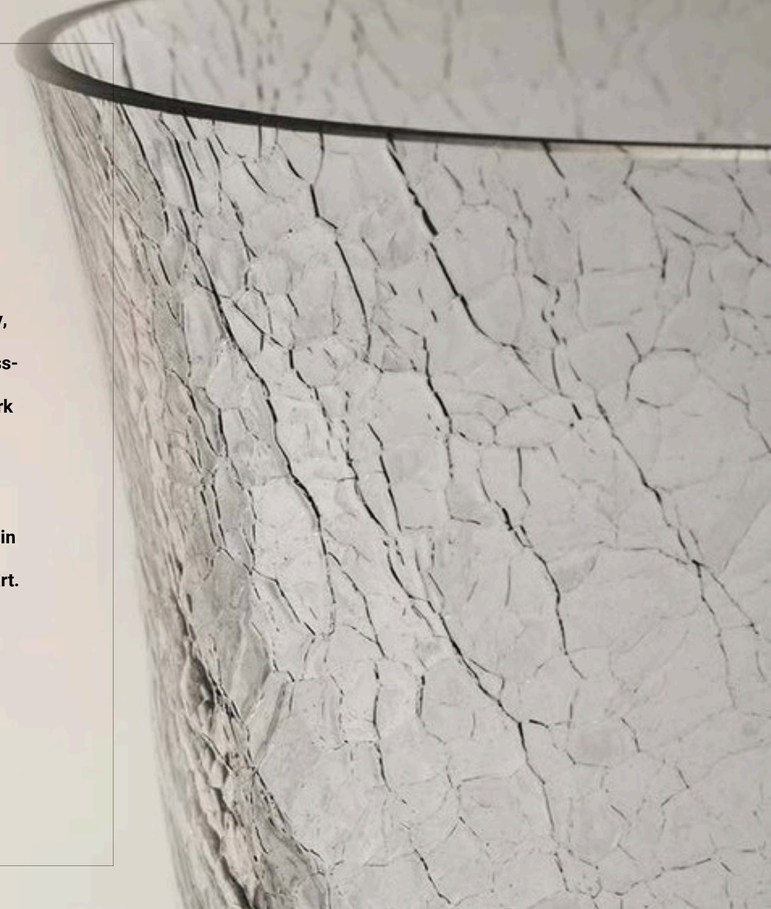

DECORATIONS

BUBBLE GLASS

The delicate effect of dewdrops captured on the surface of the glass is the result of a unique technique known as bubble glass. No machines are used in this process – instead, nature and the craftsman's precision do the work. A chemical reaction involving sodium bicarbonate creates subtle, microscopic air bubbles within the structure of the glass, giving it a distinctive, slightly pearly appearance. It is a technique that combines science and art in its most subtle form, and small differences in the arrangement and density of the bubbles mean that no two vessels are identical – each one is a unique work.

CRACKLE

At first glance it seems fragile, as if it might crumble in your hands at any moment. In reality, this intriguing pattern of cracks is a fully controlled effect created through a precise glass-tempering process. The characteristic “web” of cracks spreads across the surface like a network of fine lines, creating a unique texture of exceptional depth and luminosity. Although its appearance suggests fragility, it is in fact remarkably durable – a perfect combination of illusion and artisanal precision. Every crackle vessel is made by hand, and subtle differences in the crack pattern give each one an individual character, making every piece a small work of art.

DECORATIONS

GLASS FRIT

Decorating glass with frit is one of the most striking artisanal techniques, giving vessels a one-of-a-kind character. During production, the glassmaker rolls a hot glass bubble in fine particles to achieve a subtle, artistic accent. Frit can take various forms – from coarse, bold crystals to an almost powdery dust that fuses with the glass, creating soft, diffused reflections of light. Depending on the vision, it can be colourless, transparent or coloured. Every vessel made this way is unique – its pattern can never be repeated.

SPRAY PAINTING

Spray painting is a technique that gives glass durable and striking colour – from solid, through multicoloured, to subtle ombré transitions. It gives every design exceptional depth and colour harmony, while allowing collections to keep consistent colours and repeatable patterns. The process involves applying paint with a jet of compressed air – precisely over the entire surface of the vessel or on selected areas, according to the artistic concept. Spray painting is a harmonious blend of craftsmanship and modern technology that brings out the full visual potential of the material.
